

SKLAR IS ADDING TO ITS TRADITION OF PROVIDING QUALITY SURGICAL INSTRUMENTS . . .

ELECTROSURGICAL ACCESSORIES

Electrosurgery

Sklar's long tradition of providing quality surgical instruments continues with the introduction of a complete line of disposable electrosurgical pencils, grounding pads, active electrodes and accessories. Offering unsurpassed performance and design features, Sklar Premium Electrosurgical products are suitable for even the most challenging surgical procedures.

THE SKLAR EXPERIENCE

- Delivering value and quality you can feel, see and trust.
- Providing a knowledgeable team of account managers for your support.
- Fulfilling your product needs with uncommon service.

Single Use / Sterile

Sklar Premium Electrosurgical Pencils are available in a push button, foot switch or rocker switch configuration. Sklar pencils are ergonomically designed to provide maximum balance and comfort for the surgeon. Each pencil features a removable 2.75" stainless steel blade electrode, with hex locking feature to provide stability during difficult surgical procedures.

Unsurpassed performance and design features, like sealed switching components, make the Sklar Premium Electrosurgical Pencil the right choice. Pencil tips are interchangeable with any of Sklar's electrodes and most other manufacturer's electrodes. Sklar Pencils come standard with a pre-attached 3 meter cord with a standard three prong plug. All Electrosurgical Pencils are provided in a single use, sterile pouch.

Sklar Premium Blade Electrodes feature a ribbed molded insulator, which allows the surgeon or technician easy removal of the electrode during procedures. They are available with a hex lock feature that assures stability and prohibits rotation of the blade during difficult procedures. They are also available coated with an anti-stick material that allows easy clean up of accumulated debris.

Single Use / Non-Sterile

Sklar Premium Patient Return Pads are manufactured using an advanced design hydro-gel adhesive that, incorporated with a gel overlay system, provide a much safer return pad for both the patient and surgeon. Sklar offers Patient Return Pads in five different configurations.

RETURN ELECTRODES / GROUNDING PADS

PRODUCT NUMBER	FEATURES	QUANTITIES
96-9688	Dual Element, 9' Cord Attached, Standard	50/cs
96-9690	Dual Element, Non-Corded, Standard	5/pk, 40pk/cs, 200/cs

96-9688 and 96-9690 are dual element return pads designed to be used with electrosurgical units that are equipped with REM or Neutral Electrode safety systems that continually monitor impedance levels. The 96-9688 comes with a pre-attached 9 foot cord with standard plug. The 96-9690 requires the use of a reusable cable, 96-9698, and come in a resealable foil pouch.

PRODUCT NUMBER	FEATURES	QUANTITIES
96-9692	Single Element, 9' Cord Attached, Standard	50/cs
96-9694	Single Element, Non-Corded, Standard	5/pk, 40pk/cs, 200/cs

96-9692 and 96-9694 are traditional single element return pads manufactured using the same hydro-gel technology. Both are designed for use with all electrosurgical generators. The 96-9692 comes with a pre-attached 9 foot cord, with standard connector. The 96-9694 requires the use of a reusable cable, 96-9698, and come in a resealable foil pouch.

PRODUCT NUMBER	FEATURES	QUANTITIES
96-9696	Dual Element, 9' Cord Attached, Pediatric / Infant	50/cs

Sklar Bipolar Forceps are made of high quality materials and insulation to ensure reliability, safety and performance. Properly applied, bipolar desiccation and coagulation minimizes collateral damage to surrounding tissue. Offering a wide range of patterns, Sklar has the exact instrument for your surgery or laparoscopic procedure.

Sklar is pleased to offer a full line of Care & Cleaning agents to disinfect, decontaminate, sterilize, lubricate and protect your stainless steel surgical instruments and equipment. For expert care of your surgical instruments at every stage of the cleaning process, trust Sklar to deliver the right cleaning agent for you.

3 EASY STEPS FOR THE CARE AND CLEANING OF YOUR INSTRUMENTS

1 DECONTAMINATION

Sklar Disinfectants are a pre-cleaner and disinfectant for the safe decontamination of soiled surgical instruments, medical and surgical equipment and inanimate surfaces including plastics, stainless steel, chrome, glass, Plexiglas and baked on painted surfaces. Disinfectants are effective against a broad range of pathogens in as little as 2 minutes.

2 CLEANING

Sklar carries a complete line of effective detergents and enzymatics for cleaning, not only for your surgical instruments, but also metals, glassware, plastic and rubber. Available in your choice of powder, liquid concentrate or spray foams.

3 LUBRICATION

To guarantee extended life and performance of your surgical instruments, choose one of Sklar's lubricants or sprays as the final step in your instrument processing regimen. Specifically designed to protect against corrosion, rust and staining, Sklar offers several different types of lubricants to protect your investments.

SKLAR-CIDE™

HIGH LEVEL DISINFECTING/STERILIZING SOLUTION

Sporicidal • Bactericidal • Virucidal • Fungicidal

SKLAR-CIDE provides a safe and efficient means for the high-level disinfection or sterilization of medical, ophthalmic, dental and surgical devices including endoscopes and lensed instruments. It may be used as a standard soak solution or in automatic reprocessing units set at room temperature. Unlike other solutions, there is no need to increase the solution temperature to provide high-level disinfection in 25 minutes.

SKLAR-CIDE is a surfactant-free, activated glutaraldehyde liquid chemical sterilant and high-level disinfectant. Its active ingredient is glutaraldehyde in a nominal concentration of 3%. When the powdered activator is added, the solution turns green in color to indicate its readiness for use. In addition to the active ingredient, this ready-to-use solution contains buffers, wetting agents, and a rust and corrosion inhibitor and it has a pleasant fragrance.

SKLAR-CIDE produces high-level disinfection at room temperature in as little time as 25 minutes, and complete sterilization in 10 hours at room temperature.

- Reusable for 28 days instead of 14, safer and saves time and money.
- Surfactant free - Will not damage scope surfaces or cloud lenses.
- Can be used safely on all devices, including instruments and endoscopes. No need to stock several products.

SKLAR DISINFECTANT

READY-TO-USE SPRAY SURFACE DISINFECTANT

2 MINUTE KILL TIME

- Ready to use, non-toxic formula.
- Specially formulated for the control of cross contamination.
- Effective against a broad range of pathogens including H1N1, HIV-1, HPV, VRE, Norovirus, Hep B & C as well as TB, MRSA and A. Baumannii.
- Safe for all areas of the facility including the NICU, operating rooms, isolation rooms, patient care areas and laboratories.
- Satisfies OSHA's Bloodborne Pathogen Standards.
- Non-irritating formula.
- EPA registered.

SKLAR DISINFECTANT SURFACE WIPES

READY-TO-USE, PRE-MOISTENED TOWELETTES

SAME EFFECTIVE FORMULA AS
SKLAR DISINFECTANT!

- Ready to use, non-toxic formula.
- Specially formulated for the control of cross contamination.
- Effective against a broad range of pathogens including H1N1, HIV-1, HPV, VRE, Norovirus, Hep B & C as well as TB, MRSA and A. Baumanni.
- Safe for all areas of the facility.
- Satisfies OSHA's Bloodborne Pathogen Standards.
- Destroys odor-causing bacteria.
- 7" x 10" non-woven, tear resistant towelette.
- Clean scent.
- EPA registered.

10-1617	100 Towelettes / Canister	12/case

SKLAR SPRAY-ZYME™

SURGICAL INSTRUMENT PRE-CLEANER

Multi-Enzyme Based Instrument Presoak & Cleaner Foam Spray Cleaner

The newest product from Sklar for expert care of your surgical instruments. This multi-enzymatic spray creates a heavy foam which lasts for hours, keeping soiled instruments moist to avoid encrustation while also pre-cleaning prior to processing.

- Prevents Organic Encrustation - enzyme foam stops blood and bodily fluids from drying onto surgical instruments.
- No More Spills - messy spills between the operating room and central cleaning / processing department are eliminated.
- Neutral pH - safe and effective for stainless steel, tungsten carbide, aluminum and brass instruments.
- Bacteriostatic - microbiological control agents inhibit bacterial growth in the ready-to-use foam solution.
- Long Lasting Foam - saves time, foam lasts many hours after application.
- Multi-Enzymatic - contains a synergistic blend of lipase and protease enzymes.

PRODUCT NUMBER	FEATURES	QUANTITIES

SKLAR SOAK™

INSTRUMENT PRE-SOAK & DECONTAMINANT RUST RESISTANT!

Immersing soiled instruments in SKLAR SOAK effectively pre-cleans and decontaminates, without fear of rusting! SKLAR SOAK is an effective pre-cleaner that breaks down bio-burden, lifting blood and other organic debris from the surface, while penetrating box locks and crevices. The rust inhibitor protects the delicate chromium oxide layer of the instrument, thus defending against rust and corrosion. Using SKLAR SOAK™ as a pre-cleaner is the first line of defense against rust, prolonging the life of the instrument and therefore protecting your investment!

Soaking for only two minutes thoroughly decontaminates instruments, reducing the risk of exposure to pathogens such as H1N1, HIV-1, HPV, VRE, Norovirus, Hep B & C as well as TB, MRSA and A. Baumannii. However, because SKLAR SOAK™ contains a rust inhibitor, instruments may soak for several hours without fear of rusting! Employees are protected from cross contamination, and at the same time can enjoy the freedom to reprocess instruments when it's convenient!

SKLAR SOAK is ideal for use on all stainless steel instruments:

- PH balanced, designed specifically for stainless steel instruments.
- Intermediate level disinfectant with broad spectrum of efficacy.
- Rust resistant.
- Non-caustic.
- Ready to use.
- No special handling or disposal.
- Fragrant, no offensive odors.
- Non-glutaraldehyde.

10-1609	1 Gallon Bottle	1 bottle

SKLAR INSTRU-GUARD™ ONE STEP

**A “ONE STEP” INSTRUMENT
CLEANER AND LUBRICANT**

EXTENDS INSTRUMENT LIFE!

SKLAR INSTRU-GUARD ONE STEP contains a penetrating lubricant that protects and helps extend the life of surgical instruments. The detergents and emulsifiers quickly break up and remove organic soils from box locks and other hard to reach places.

SKLAR INSTRU-GUARD ONE STEP contains four rust inhibitors to control corrosion and eliminate scaling and spotting. It does not contain phosphates and can reduce the time and cost involved in processing your instruments by cleaning and lubricating in one easy step.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2800	1 Gallon Bottles	4/case
10-2801	1 Gallon Bottle	1 bottle

SKLAR INSTRU-GUARD™ LUBE

SURGICAL INSTRUMENT LUBRICANT / RUST INHIBITOR

- Increase the Life of Instruments.
- Protects all Surgical Instruments.

SKLAR INSTRU-GUARD LUBE is an easy-to-use, water soluble, lubricant and rust inhibitor. When used daily as a rinse after every cleaning it keeps moving parts operating smoothly and remains effective after autoclaving, but without leaving an oily residue.

Regular lubrication is essential no matter which cleaning method is employed (including ultrasonic). SKLAR INSTRU-GUARD LUBE is ideal for maintaining instrument quality and performance.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-1635	1 Gallon Bottles Concentrated	4/case
10-1634	1 Gallon Bottle Concentrated	1 bottle
10-1636	8 oz. Spray Bottles	12/case

SKLAR KLEEN™

LOW FOAM, LIQUID DETERGENT AND POWDERED FORMULA

Regular Formula for Manual and Ultrasonic Cleaning

SKLAR KLEEN is non-corrosive, non aggressive, phosphate free and biodegradable. We have specifically developed SKLAR KLEEN for manual and ultrasonic cleaning. It is moderately alkaline, affording optimum cleaning without etching glassware or attacking instrument metal.

Low Foam Formula for Automatic Cleaning

The SKLAR KLEEN Low Foam Liquid is concentrated in order to provide a very cost-effective solution. It is especially formulated to maintain low foam, ensuring effective and trouble-free action in washer/sterilizers and tunnel washers. Dispersing quickly, the SKLAR KLEEN Low Foam formula is also well suited for automatic injection systems.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2701	Low Foam 1 Gallon Bottles	4/case
10-1608	Powdered 5 lb. Containers	4/case
10-1607	Powdered 5 lb. Container	1 container
10-1630	Powdered 3.5 lb. Pitchers	6/case
10-2765	Powdered 3.5 lb. Pitcher	1 pitcher
10-1612	Liquid 8 oz. Bottles	6/case
10-1614	Liquid 8 oz. Bottle	1 bottle
10-1613	Liquid 1 Gallon Bottles	4/case
10-1627	Liquid 1 Gallon Bottle	1 bottle

SKLAR-SHEEN™

AUTOCLAVE AND INSTRUMENT CLEANER AND CONDITIONER

With an efficacious phosphoric acid cleaning agent, Sklar Sheen is a robust spot, stain and rust remover. Ideal for dissolving hard water deposits, use in autoclaves to quickly cut through steam sterilizer scale and deposits.

Versatile and effective, SKLAR SHEEN couples powerful stain and rust removers with corrosion inhibitors, making it tough on stains but gentle on instruments. Recondition instruments to restore them to nearly brand new working condition.

Use to clean and recondition any stainless steel surface to its original luster, including carts, trays and basins.

- Conditions for lasting protection.
- Dissolves hard water deposits.
- Frees up frozen box locks.
- Restores and extends surgical instrument life.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2736	Spray Foam Autoclave Cleaner & Conditioner	22oz. bottle
10-2738	Spray Foam Autoclave Cleaner & Conditioner	12/case

SKLAR ENZYMATIC™ DETERGENT

MULTI-ENZYME DETERGENT CONCENTRATE

100% Biodegradable

SKLAR ENZYMATIC Detergent is a low-foaming, fast acting detergent specifically designed for use when instruments and/or cloth materials become soiled with organic debris.

SKLAR ENZYMATIC Detergent may be used as a manual instrument cleaner as well as a pre-soak for blood-contaminated linens, clothing and instruments. It is also used in ultrasonic units and in washer/sterilizer/decontaminators. When used as directed, the enzymatic pH neutral formula is safe for use on rubber, plastic, stainless steel instruments, and surgical equipment as well as cloth.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2777	1 Gallon Bottles	4/case
10-2775	1 Gallon Bottles	2/case
10-2776	1 Gallon Bottle	1 bottle

3 EASY STEPS FOR THE CARE AND CLEANING OF YOUR INSTRUMENTS

DECONTAMINATION

**1 SKLAR SPRAY DISINFECTANT™
Disinfectant / Decontaminant Cleaner**

SKLAR DISINFECTANT is a pre-cleaner and disinfectant for the safe decontamination of soiled surgical instruments, medical and surgical equipment, and inanimate surfaces including plastics, stainless steel, chrome, glass, Plexiglas and baked on painted surfaces. The use of SKLAR DISINFECTANT for 2 minutes kills infectious organisms including H1N1, HIV-1, HPV, VRE, Norovirus, Hep B & C, as well as TB, MRSA, and A-Baumannii.

CLEANING

**2 SKLAR KLEEN™ DETERGENTS
AND ENZYMATICS**

Sklar has an array of agents for effectively cleaning not only your surgical instruments, but for other metals, glassware, plastic, and rubber. SKLAR KLEEN detergent is available as a powder or liquid. Our enzymatic products, specially formulated for processing instruments heavily laden with organic debris, are concentrated and available in a variety of sizes. Sklar also offers SPRAY-ZYME™ a new foam spray pre-cleaner.

Choose The Cleaning Product Right For You!

LUBRICATION

**3 SKLAR LUBRICANT
AND SPRAY LUBE™**

SKLAR LUBE should be a part of your instrument processing regimen to guarantee extending the life and performance of this very important investment. Sklar offers several different types of lubricant to suit your needs. All designed specifically for surgical instruments, they each contain rust inhibitors to protect against corrosion, rusting, and staining.

YOUR FINAL STEP IS AUTOCLAVE STERILIZATION **Your Instruments Will Look And Work Like New!**

SKLAR STAT™

INSTANT FOAM HAND SANITIZER

KILLS 99% OF GERMS IN LESS THAN 15 SECONDS!

SKLAR-STAT Instant Foam Hand Sanitizer, based on the active ingredient Benzalkonium Chloride, is a unique formulation featuring exceptional skin feel, conditioning and moisturizing properties. The efficacy of this product has been confirmed to reduce *S. Aureus* 99.999% and *S. Aureus* MRSA 99.9% in as little as 15 seconds. SKLAR-STAT Instant Foaming Hand Sanitizer produces a fast drying, non-sticky foam that contains unique conditioning and moisturizing ingredients, leaving the skin with a soft, silky after-feel.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2850	50 ml Pump Dispensers	24/case
10-2852	550 ml Pump Dispensers	12/case

SKLAR STAT™

AUTOMATIC FOAM DISPENSER

Motion activated, battery powered and wall-mounted, Sklar's AUTOMATIC FOAM DISPENSER allows for easy access and reduced risk of cross contamination. Ideal for use in hospitals, medical centers, offices, schools and any high-traffic public area with multiple users.

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2856	Wall Mount Dispenser	1 Each
10-2854	1000ml Refill Bottles	6/case
10-2858	(2) Cases 1000ml Refill Bottles plus Free Wall Mount Dispenser	1 Set

- Alcohol-Free
- Non-Sticky
- Moisturizes and Conditions Hands

1. Pump a small amount into palm of hand.
2. Rub thoroughly over both surfaces of both hands.
3. Rub hands together briskly until dry.

SKLAR FRESH™

LIQUID SPRAY ODOR ABSORBER

SKLAR FRESH is an environmentally friendly blend of pure biodegradable organic essential oils and trace elements. It is a non-allergenic liquid spray that neutralizes odors at their source. Simply spray SKLAR FRESH directly in the air or on the source (i.e. bathrooms, refuse, soiled items from vomitus, incontinence odors, etc.)

PRODUCT NUMBER	FEATURES	QUANTITIES
10-2842	22 oz. Spray Bottles	12/case

SKLAR POLISH™

INSTRUMENT STAIN REMOVER

Non-Abrasive

SKLAR POLISH is an effective stain remover for use on all your metal surgical instruments, including stainless steel, chrome and brass. It will brighten instrument trays, basins and racks and may also be used on porcelain and tile surfaces.

PRODUCT NUMBER	FEATURES	QUANTITIES

	Sklar Kleen™ Liquid 8 oz. Bottle	1 each
	Sklar Polish™ 8 oz. Jar	1 each
	Stainless Steel Bristle Cleaning Brush	1 each
	Nylon Bristle Cleaning Brush	1 each

TROUBLE SHOOTING

NO STEEL IS TRULY “STAINLESS”

It’s a fact that so-called stainless steel is subject to both water-spotting and staining. However what many people identify as a “rust” problem usually turns out to be something else.

Most often the problem is actually a stain caused by a surface deposit. These deposits appear in a variety of colors depending upon the type of deposit involved. Once the cause is found and eliminated, most of the time the problem quickly diminishes or disappears completely.

As you probably know, stainless steel is ideally suited for the surgical suite because it is rust resistant, it can be honed to an extremely sharp edge or fine point,

and it can be hardened to maintain the delicate, yet precise, requirements of the surgeon. But it is this hardenable quality – the amount of carbon used during the manufacturing process – coupled with harsh chemicals and improper care that renders stainless steel susceptible to corrosion.

To protect your instrument investment, Sklar cleaning agents have been specifically formulated to provide cost effective instrument care solutions that help maintain the life and performance of your valuable stainless steel instruments.

TROUBLE SHOOTING

CORROSION

- Problem:** Debris and residue in box locks, serrations and ratchets.
- Solution:** Serrations, box locks and ratchets should be carefully cleaned and rinsed. A soft bristle brush is effective in these difficult areas.
- Problem:** Moisture remaining on the instruments within the sterile wrapped packs; excessive moisture in autoclave during sterilization and termination of cycle.
- Solution:** Preheat autoclave, drying time cannot be accelerated, open autoclave door slightly. Routinely inspect valves. Malfunctioning valves can precipitate corrosion.
- Problem:** Some local water supplies contain excessive quantities of alkali. This can manifest itself by depositing corrosive matter on the instruments.
- Solution:** It is generally accepted that cold distilled or demineralized water be used during sterilization. An alternative is to use the local water supply, while instituting a program of preventive maintenance. Carefully clean surfaces with SKLAR KLEEN™, using SKLAR POLISH™ to remove difficult stains and SKLAR LUBE™ for proper lubrication.

PITTING

- Problem:** Instruments are inevitably exposed to chemical compounds that initiate pitting. The most common are saline solutions and blood.
- Solution:** It is essential that instruments be rinsed with distilled or demineralized water and then cleaned routinely.
- Problem:** Some Non-Sklar detergents contain a chloride or have an acid base. If rinsing is not thorough, the residual detergent can precipitate pitting. Hydrochloric acid can be formed by the combination of chloride in the cleaner and steam, causing the instrument to pit.
- Solution:** Evaluate detergents without a chloride base. SKLAR KLEEN™ is recommended.
- Problem:** Instruments may be pitted when the detergent used has an excessively high pH. If instruments are not rinsed thoroughly and then autoclaved, the heat increases the effect of the solution on the instruments.
- Solution:** Use only detergents specifically developed for instrument cleaning. SKLAR KLEEN™ products are pH balanced.

BROWNISH STAIN

- Problem:** This stain is more obvious on dull finish instruments. Most likely, it is a deposit of chromium oxide. The thin hard layer protects stainless steel from corrosion precipitated by the atmosphere. The brownish film (sometimes dull blue) occurs naturally when stainless is heated. Occasionally this stain can be traced to the sterilizer. Improper cleaning compounds could contain poly phosphates that cause the copper components in the sterilizer to be deposited by electrolytic action on the stainless steel instruments.
- Solution:** Water supply to autoclave should be cold and demineralized. Use the correct amount of SKLAR KLEEN™ as recommended for best results.

BLUISH GRAY STAINS

- Problem:** Cold sterilizing solutions.
- Solution:** In the preparation of the solution make certain the manufacturer's directions are followed accurately. To minimize discoloration use distilled water and add a rust inhibitor. Using the solution beyond recommended time limitations will cause the solution to become corrosive.

RUST DEPOSIT

- Problem:** Sterilizing instruments of different metals in the same cycle will cause rusting. An electrolytic action carries the carbon particles from the exposed metal and deposits them on the stainless steel instruments. The rapid oxidation of molecules results in a surface film of rust.
- Solution:** The ideal technique would be to sterilize the two types of instruments separately. It is recommended that chrome plated instruments that indicate signs of peeling or flaking be replaced with stainless steel instruments.
- Problem:** The rust film on the surface of stainless steel instruments can be caused by chemicals in the detergent. Excess amounts of iron or other minerals from the local water supply may cause the rust deposits.
- Solution:** It is recommended that instruments be rinsed with distilled or demineralized water. Surface rust can be removed by light buffing or an application of SKLAR POLISH™.

LIGHT AND DARK COLORED SPOTS

- Problem:** Spotting caused by slow evaporation of water drops identified with the mineral content of the water.
- Solution:** Eliminate water droplets by adhering to autoclave manufacturer's operating instructions. Autoclave door should not be opened until steam has been completely vented.
